

Mother Nature's Complete Body Nourishment in a Bottle

Straight from the earth! Achieve maximum health and improve performance with Mother Nature's perfect "multi-vitamin" – 550x stronger than any vitamin tablet!

Get every vital, health-giving mineral, nutrient, and vitamin your body craves – **in just a few drops!**

Did you know that your body is made of about 10 trillion cells? How you fuel those cells determines your overall health, stress tolerance, energy level, athletic performance, ability to recover, and much, much more.

Did you know that your body replaces most of those cells with new ones every 5-7 years? And that some of your cells – like blood, gut, and skin cells – turn over within a matter of months, if not weeks? That means that better cell nourishment can have ***an almost immediate impact*** on your most vital organs.

LeBron James spends ***more than seven figures*** every year to keep his body in optimal shape. He understands that each and every cell contributes to the quality of the whole.

Each cell serves a specific purpose in your body and many supplement brands sell specific "cocktails" of minerals, nutrients, and vitamins aimed at various organs, trying to help them perform their job optimally.

But there's a much easier and more affordable way to nourish those 10 trillion cells, and it'll take you a lot less time, too. Wouldn't you want to maximize the health of each and every cell so it's an efficient, well-fueled machine bursting with life, strength, and long-lasting energy? Of course you would!

You Need Minerals!

If you're an athlete or fitness enthusiast, you want to be 100% sure you're on the cutting edge of the best training and diet methodologies.

With BeGood's Advanced MicroNutrient Drops, you are – and it's all in one little bottle.

Athletes have told us that our formula makes ***the*** major difference in their overall performance. In fact, they've said that if they had to choose just one supplement, it would be our drops!

BeGood™

S U P P L E M E N T S

Our bodies run on electricity. That's a scientific fact. You also know that we are about 60% water. But what holds our bodies together in perfect form as electrical reactions go off all day inside? You guessed it, **minerals and micronutrients**. Minerals work closely with many enzymes to kick-start major bodily processes such as digestion.

Simply put—without minerals, you would die. But our bodies don't produce them—we have to get them from an outside source.

Many of us just don't get enough minerals due to our crazy diets, stress levels, and physical pain/disease – not to mention the depleted soil most of our food grows in. But if you could “top off” the tank on your mineral supply, you'd see and feel a MAJOR difference in your everyday life.

If you want...

- Better brain function
- Muscle cell repair
- Better muscle performance
- More energy, stamina, endurance
- Freedom from pain and inflammation
- Better cellular oxygenation and nutrient absorption from food & supplements
- Optimal bone density and strength
- Anti-inflammatory support
- Deeper and more restful sleep
- Quicker recovery after exercise
- Faster healing after injury
- Enhanced healing of muscle pulls & exercise related injuries
- Protection from age-related diseases and conditions

...then you MUST try BeGood's Advanced MicroNutrient Drops. In every drop, you'll get:

- Major minerals: calcium, phosphorus, potassium, sulfur, sodium, chloride, magnesium.
- Traceminerals: chromium, iron, selenium, fluoride, zinc, copper, iodine, manganese, molybdenum, cobalt.
- Ultratrace minerals: nickel, silicon, boron.

And where do our minerals come from? Well, the one who knows best, of course: **Mother Nature.**

BeGoodTM

S U P P L E M E N T S

BeGood's Advanced MicroNutrient Drops contain only the highest quality minerals & micronutrients from the most natural, untouched sources on earth. **THESE** are the minerals Mother Nature intended us to consume for perfect health.

Your 10 daily drops of our mineral formula will have you feeling much more alive, vigorous, strong, and capable of consistently better athletic performance.

How Our Formula Works

Our micronutrient drop formula works by getting deep into your cells and scrubbing out toxins. That alone does wonders, but then our mineral formula **rebuilds** the cell to perfection.

Our company, BeGood Supplements, is recognized as the producer of the highest quality liquid trace mineral liquid drops in the world today. The efficacy of our BeGood Advanced MicroNutrient Drops is the highest ever produced.

It is our belief that our micronutrient drops should be made available to anyone looking to gain optimal health, but especially to:

- **Professional athletes in every sport**, whose profession takes a serious toll on body and mind.
- **People with age-related diseases and health conditions**, so they can live an unrestricted life.
- **Anyone who feels their health is not 100%**. The increased well-being you can feel from a full mineral supply will make a massive difference in your day-to-day life.

You will find that these drops are one of the absolute best investments you can make for your health and well-being. This is a supplement that will pay you dividends every day you take it.

BeGood's Advanced MicroNutrient Drops...

1. Contain nature's most potent micronutrients, organic acids, trace minerals, and fulvic minerals.
2. Are nature's most potent electrolyte.
3. Act as a molecule carrier, increasing nutrient uptake by the cells.
4. Contain hundreds of micronutrients not normally available in a single supplement.

BeGoodTM

S U P P L E M E N T S

5. Deliver more oxygen to the cells, boosting performance, endurance, and longevity.
6. Reduce muscle soreness by improving evacuation of lactic acid from the muscles.
7. Boost adrenal efficiency, resulting in longer and stronger bursts of muscle power.
8. Balance the glandular system, resulting in better sleep and clearer thinking.
9. Improve bone density for greater strength.
10. Increase mineral absorption.
11. Improve cell hydration and provide the electrolytes you need both pre- and post-workout.
12. Support a healthy digestive microbiome in the gut.

Imagine how much power your body takes in from minerals that have absorbed the energy of **millions of years of sunlight and rich plant matter**. Ours are from one of Mother Earth's richest mineral deposits and cannot be replicated, as we own the deposit we source from.

BeGood Advanced Micronutrient Drops are the absolute purest combination of:

- 70+ minerals, trace elements, and trace minerals
- 24 micro-amino acids
- 30 organic acids, including fulvic acids

Fulvic acid is an active chemical compound that helps our bodies absorb and assimilate minerals. The fulvic mineral concentrate content of BeGood's Advanced MicroNutrient Drops has been validated by an independent lab at **more than 5%**. Our competitors contain less than 1%.

BeGood Supplements is the **only** company able to produce this fulvic mineral concentrate. You simply cannot find an equal product anywhere on the market. Independent lab results (see here) state that our drops are far and away the best mineral formula available in the world today.

What else is so great about fulvic acid molecules? Glad you asked!

- They increase enzyme activity and reduce the surface tension of cells, allowing for the passage of nutrients into cells.
- They bond with needed trace minerals and act as a vehicle for minerals to be absorbed by the body.
- They can carry up to sixty times their weight in minerals.
- They are potent antioxidants.

Competing products get their fulvic acid from leonardite (a type of coal)! They use synthetic ingredients simply because they are cheaper, but guess what... your body HATES cheap synthetic ingredients. It won't absorb them and you may even experience negative side effects. Remember, your body wants the real deal from Mother Nature.

In fact, in many cases, ***just a few drops*** of BeGood's Advanced MicroNutrient Drops exceeds the cellrepairing benefits of an entire bottle of competing products. Just read the labels and you'll see.

Careful Extraction = Superior Concentration

BeGood's Advanced MicroNutrient Drops are extracted using double-stage reverse osmosis water, resulting in highly purified water that can be super-saturated with the highest grade natural ingredients contained in our deposit material.

**So what can YOU expect with your daily supplement of BeGood's Drops?
We'll let our customers tell you...**

Gary McDonald from Houston, Texas, USA says... "I started taking these mineral drops 3 weeks ago and have noticed a HUGE difference in how I feel and sleep, and more energy."

Doug Peterson from Richmond, BC, Canada says... "In the past several years, I noticed that my body was taking much longer to heal from injury and illness. I entirely attributed it to age. Then my trainer mentioned BeGood's Advanced MicroNutrient Drops. I tried them for 4 weeks and the condition that was stubbornly taking its time to heal started to not only heal but normal function returned. I am truly grateful to have found the missing link in the nutritional support regime."

BeGoodTM

David Geffen from Los Angeles, California, USA says... "I've been taking the BeGood's Advanced MicroNutrient Drops for one year. The consistent improvement in health cannot be understated. Over the course of the year, I've recommended these minerals to most of my friends, and they have had similar results. You can't find purer plant-derived minerals anywhere else."

Greg Brady from Toronto, Ontario, Canada says... "I went 3 months without these minerals and started having pains in my legs and lower body. I also had very low energy, which went away after 3 days of taking these minerals & the pain in my legs went away as well. I am 64 and still work as a general contractor doing all kinds of construction. I'm in very good health and my yearly blood work always comes back perfect. My doctor is amazed and says that most male patients my age have a lot of health issues. I have been taking these minerals every day consistently and feel great. They work and I'm glad to be this healthy!"
