

BeGood Advanced MicroNutrient Drops Pro Athlete Testimonials

Jason Akeson

Hockey player – Tendonitis

“Hockey puts a lot of pressure on your legs, especially when you train like we do – all the skating, and then you’re twisting and turning, trying to defend yourself, get the shot in the right place, get the puck away from the other guy. You can end up with tendonitis – that kind of inflammation is really painful.

“I stopped getting tendonitis when I started taking BeGood Advanced MicroNutrient Drops. It was like a miracle. Then I forgot to order them for a couple of months, and my energy went way down and the tendonitis came back. I make sure I always have a spare bottle now.”

Nicolas Anderson

Hockey Player – Groin Strain

“In pro hockey you skate like a freight train, put on the brakes, get a groin strain. Lather, rinse, repeat. A lot of physical therapists will want you to stretch to build up the muscles there, but even the most strategic stretches they thought of weren’t helping me much. I actually think they made everything worse. I’ll tell you what *has* helped – these drops our team doctor told me to get, BeGood Advanced MicroNutrient Drops.

“The nutrients in these drops have strengthened my whole body – really, I feel stronger all over, and I’m getting injured a lot less now. I’m playing full out in every game because I’m just not afraid I’m going to injure myself anymore.”

Erik Anderson

Hockey player – High Ankle Sprain

“High ankle sprains are pretty common in hockey. I got one and it took me six weeks to heal the ligament and almost three months to start playing right again.

“I was skeptical when our coach told us to start taking BeGood Advanced MicroNutrient Drops. I think he wasn’t quite sure if they were the real deal either. But I had just gotten another high ankle sprain and this time, with the drops, I healed in about half the time. I thought I might get another one sometime, that I had weakened the joint – but no, I can tell now that my muscles and ligaments are way stronger, like cell by cell, and I have not been injured like that since.”

Leo Crowe

Basketball Player – Ankle Sprains

“It’s easy to sprain your ankle playing basketball. But it’s hard to sprain your ankle when you’re taking BeGood Advanced MicroNutrient Drops. Which is saying a lot, because once you sprain an ankle it usually gets weaker and you tend to sprain it over and over. But all the nutrients you get in these drops just make everything stronger – soft tissue, bone, your whole body and all its systems.

“I have so much more energy, too! Running up and down the court is easier now than it was ten years ago. My energy stays up even during long games. And I can really pour on the power when I need to.”

Erik Daniels

Basketball Player – Knee Trauma

“You know in basketball, we blow out our knees first. When I started taking BeGood Advanced MicroNutrient Drops, my knees started feeling better right away. Not only did the drops heal acute trauma, they also got me back to normal function of my knees. They are a life-saver!

“I take them everywhere, to all my games. I recover a lot faster from workouts now, too – my muscles aren’t sore afterward. You need to get these drops!”

Sasha Danilovic

Basketball player – stress fractures

“I was used to getting stress fractures in my legs from playing hard and running at top speed up and down the court. The bone isn’t broken in two, but stress fractures hurt and they were really slowing me down even though I was trying to ignore them.

“I have not gotten a single stress fracture since I started taking BeGood Advanced MicroNutrient Drops. Besides making my bones incredibly stronger, they are helping me sleep a lot better, so I’m getting in good healing time as I rest.”

Kelly Acosta

Soccer Player – Cartilage Tears

“A lot of my friends on other teams get cartilage and ligament tears playing soccer. That can end your whole career and put you in bad shape for the rest of your life. All of us on my team take BeGood Advanced MicroNutrient Drops, and our incidence of cartilage and ligament tears has gone way down. We swear by them.”

Romain Alexander

Soccer Player – Shin Splints

“Any sport where you run a lot can give you shin splints. They really interfere with your game. But BeGood Advanced MicroNutrient Drops head them off completely. Shin splints are just not a problem for me anymore.

“I feel like I can do anything on the field now, too – run as long and hard and fast as I need to. I have better wind and my heart is doing great. I’m thinking more clearly both on and off the field. I recommend BeGood Advanced MicroNutrient Drops to every athlete who wants to perform at their very best!”

Alessandro Nesta

Soccer player – Kneecap Pain

“Soccer is my life. Then I got sidelined with patellofemoral pain. I didn’t want to end up getting surgery that might or might not fix the problem. So I took my coach’s orders and started taking BeGood Advanced MicroNutrient Drops. They really did the job! The pain went away and my whole knee feels better. My endurance is way up, too.

“Now my whole team takes BeGood Advanced MicroNutrient Drops. They are the best supplement we’ve ever taken. We’re all performing better and feeling better – I don’t know what we’d do without them!”

Roy Monteiro

Football Player – Wrist Break

“You may not realize it, but football players break their wrists a lot. A wrist is a delicate joint that doesn’t deal well with having heavy players and tons of gear falling on it in a tackle situation. And then going forward once you recover you’re left trying to snap the ball with a wrist that just is not working the way it used to.”

“My whole team started taking BeGood Advanced MicroNutrient Drops. First a couple of guys with wrist breaks recovered faster and better than anyone expected. Then we all noticed that our wrists and other joints were feeling a lot better – stiffness and inflammation was going away, flexibility was returning. A lot of guys felt like their bones in general had gotten a lot stronger. These drops are liquid gold. I recommend them for your team too! Find out what I’m talking about by making sure every team member takes them for a month and see what happens! You’ll be glad you did.”

Richard Hicks

Football Player – Turf Toe

“If you’re playing football on artificial turf, it really means you’re playing it on concrete with a little green fur coat. And when you run and jump on concrete for hours every day you can get a condition called ‘turf toe’ – an injury to the base of the big toe. It hurts and it messes with your game.

“Fortunately somebody gave me a bottle of BeGood Advanced MicroNutrient Drops to try. The turf toe cleared up fast, because my whole body was handling tackles and concrete and everything else much better. I was finally getting enough of the minerals and nutrients my body needed for optimal performance, and to heal and handle everything that was coming at it from the game. BeGood Advanced MicroNutrient Drops have made a huge difference in my health and athletic performance, and now that’s true for everyone on my team. Thank you, BeGood!”

John Williamson

Football Player – Hip Pointer

“You have to love the game to play football, and I do. I also know how hard it has been on my body, from bone bruises to a pelvic fracture. I worry about it all a lot less, though, now that I’m taking BeGood Advanced MicroNutrient Drops. Because I was taking those drops, my pelvic fracture healed really well, and really fast. I’m not getting bone bruises when I get tackled anymore because my bones are tougher than they were before, which I’m sure has prevented a lot of further broken bones. This is the supplement every football player should be taking.

“It’s also clear I’m thinking better, and my immune system is functioning better than it ever has. I never get a cold anymore, or the flu, and I’m in serious contact with other players all day every day. I travel a lot and I never get sick. Try these drops! My whole team recommends them to your team!”

Dennis Noda

Golfer – Knee Pain

“One of my knees was getting weaker and weaker, and playing golf was putting a strain on it that was putting my whole body out of whack, and really causing a lot of pain in that knee. I tried a bunch of knee braces but I knew that was just a short-term fix.

“Then another golfer told me about these drops – how much they had helped his knees. He was right, and these have been beyond my expectations in how much they have helped. I highly, highly recommend them. I’m back to playing more than ever and my knee is strong like never before.”

John Wong

Golfer – Back Pain

“With these drops I’ve noticed that I can now do four or five hours bent over and swinging hard without my back hurting. At all! I don’t know any golfer who is not taking these drops who can say that, unless they’re fifteen.

“I can tell I’m staying hydrated better with these too, even on hot days, because of all the electrolytes in the minerals. Amazing!”

Dan Klassen

Golfer – Tendinitis

“I used to have a lot of trouble with golfer’s elbow – sore inflamed tendons of the elbow. All those repetitive movements, such as hitting golf balls. That’s why you see a lot of golfers wearing those armbands up near the elbow. The pressure on the muscle around the tendon is supposed to heal the swelling and inflammation.

“But they never address the root of the problem. These drops go after the inflammation itself, stopping it before it starts. What a difference!”

Michael Vass

Tennis Player – ACL Tear

“A torn ACL isn’t really a career-killer anymore for tennis players, but your body and your performance aren’t what they were. I wasn’t sure how I was going to heal from this, but I kept looking for answers. Luckily another player gave me a bottle of BeGood Advanced MicroNutrient Drops. *Wow!* My performance is actually better now than it was before I tore my ACL – these drops are that good for you.

“I took 20 drops a day for a while until I healed from the surgery, and my doctor said he’s never seen a better recovery. I could do all the stretches right away, and build on the rehab exercises, and just got stronger and stronger and more and more flexible. These drops seem to be exactly what my body needed, and more – like above and beyond more. Now I take 10 drops a day for maintenance and daily nutrition, and I’ve never felt better in my life.”

Adam Tran

Tennis Player – Tennis Elbow

“Tennis elbow is one of those common conditions that can dog professional players for months, even years – just a steady pain that affects everything you do, on and off the court – just lifting a coffee cup is agony. When you’re a pro, you need it to stop ASAP so you can get back to winning matches. I tried a lot of high-tech interventions that would work for a little while, but then the pain would come back, because they didn’t fix the inflammation. It was a lot of money and time down the drain.

“BeGood Advanced MicroNutrient Drops fixed my tennis elbow fast and for keeps. It completely got rid of the inflammation by safely supplying high-quality nutrients my body was lacking. I could hardly believe my luck. Now the pain is gone, I have a huge amount of energy, and my tennis game just keeps getting better. Thanks, BeGood!”

Mark Watson

Tennis Player – Rotator Cuff Tendonitis

“I injured my rotator cuff – that’s the casing of tendons and ligaments that supports the arm at the shoulder joint – over time playing tennis. You’re supposed to rest it a lot to heal it, but it’s tough to give an injury like that all the time it needs off the court when you’re a professional player. I was taking a lot of anti-inflammatory drugs that weren’t helping much.

“I knew someone who had tried BeGood Advanced MicroNutrient Drops for the same thing, and asked him about his experience. He recommended them unreservedly – and I am recommending them to you! Because they helped where nothing else was helping, and they helped completely. My rotator cuff has healed quickly, to the surprise of my doctor, and the inflammation has disappeared. They are the best thing you can buy for sports injuries.”

Roy Breznik

Olympic Skier – Broken Leg

“Broken bones, especially broken legs, are really common among competitive skiers. There are so many things you can slam into on the slalom – the gates, other skiers, a patch of ice ... You can just fall on yourself!

“But my doctor has told me I don’t need to worry as much about breaking something now. He says that since I started taking BeGood Advanced MicroNutrient Drops, my bones have gotten a lot denser and are much less likely to break. I definitely feel stronger and less fragile – ready for anything.”

Alex Mack

Olympic Snowboarder – Broken Leg

“I broke my leg landing a half-pipe wrong. It hurt like crazy. But it also healed super-fast when I started taking these drops the team doctor told me to take – BeGood Advanced MicroNutrient Drops.

“Other snowboarders have told me how long they were out of commission with a broken bone, and nothing like that happened to me, which was great because I had another competition coming up. I healed up and got off crutches in just X weeks. I recommend these drops to anybody with a broken bone.”

Michael Carlson

Olympic Runner – Achilles Tendinitis

“I used to get Achilles tendinitis a lot when I was training hard, but then I started taking BeGood Advanced MicroNutrient Drops. Now I hardly ever have that problem. The drops let me train a lot harder, and my time is better, too.”
